A LIGHT AND REFINED SEASON

2022 marks the 20th anniversary of House Doctor. This collection reflects that as it looks back and points in a new direction all at once. Well-known designs are updated in new colours and new designs are introduced by looking to the past. This is a season of impressions. The grand ones. The first ones. And the lasting ones.

Our furniture category gets a makeover and grows with pieces that go the distance. Look forward to upholstered furniture, designs that explore the innate beauty of rattan and not least wooden items that add shine to your home décor. Common for all is a lightness and balance in both materials and shapes.

A sense of nostalgia sweeps through the season as we look to

the elegance of long-gone decades. Mirrors with facet cut glass bring an art deco feel to your décor while metal florist vases channel the atmosphere of a Parisian florist. Iconic and classic shapes are given the House Doctor treatment to make them popular for years to come.

Common for all categories is the adventurous exploration of materials. Metals reflect the light around us, open the space and can be enjoyed in lanterns, vases and lamps. Rattan and wood furniture add a natural touch to every room in your home while glass décor is given a lighter look with air bubbles. This season truly pays homage to the qualities of each material and puts it on display in endlessly stylish designs.

Reflecting light with textures and
finishes for an open space
